Intensive Talks! Web Event
## Educational Games: Interactive Quizzes

_____

Kahoot is a multiplayer classroom activity that allows all your students to practice together.

★ Teachers and students can **create** quizzes, games or use **pre-existing** kahoots.
★ Teacher uses one shared screen.
★ Students answer on their **own devices** using a multiple choice format.
★ Students get points for **accuracy** and **speed.**
★ Can be played **individually** or in **team mode.**
★ No student account needed: students must enter a pin code associated with the game.

Quizizz is a multiplayer activity that allows all your students to practice together. Similar to Kahoots but...

★ Students can see the **questions and answers** on their own screens.
★ Students can answer at their **own pace.**
★ Can be used for homework.
★ No student account needed: students must enter a code associated with the quiz.

Quizlet

Quizlet is a platform that allows students to study, practice and review vocabulary and notions.

- ★ Uses **study sets** and provides 6 different learning options: Flashcards, Learn, Scatter, Test, Space Race, Speller.
- ★ Complete lessons are easily created by Quizlet using the teacher's or student's study set.

| Flashcards	Learn	Test
Allows you to review all the key terms in the set, shuffle/randomise, or listen with audio.	Allows you to track your correct/incorrect answers and retest the ones you've missed.	Randomly generates tests based on your flashcard set.
Scatter	**Space Race**	**Speller**
Race against the clock to drag and match terms / definitions.	Type in the answer as terms / definitions scroll across the screen.	Type what you hear in this audio-powered study mode.

Example of an ESL Quizlet (Food Vocabulary). Click on the **Study Sets** (Flashcards, Learn, Speller, Test, Scatter and Gravity) to try it out. https://quizlet.com/14400485/esl-food-flash-cards/

plickers
clickers, simplified

With Plickers, the teacher creates a question and projects it onto a screen. Students hold up their custom response cards using the different orientations to indicate their answers. The teacher holds up a device and scans the students' answers. Results are compiled and can be projected onto the screen!

- ★ No mobile devices needed for the students-just plickers (answer cards).
- ★ Only the teacher uses a mobile device.
